

## Assignment: JavaScript 1

Wednesday, November 5, 2025 1:19 PM

Based on the given HTML,  
Writing a JavaScript that will print an unordered list (ul) line number  
from 1 to 20 except for line 5, 10 and 15.

```
<html>
<body>
  <ul id="list1"></ul>
  <script>
    //Add your code here
  </script>
</body>
</html>
```

**Hint:**

To add a new list item to the target list element use:

```
document.getElementById("list1").innerHTML +=
`<ul>${i}</ul>`;
```

Assume that "i" is your counting variable.

Observe the HTML elements comparing with page source (using  
view page source).
